

#### Neighborhood Watch Association:

The Watervliet Police Department has one officer assigned as a liaison between the Neighborhood Watch Association and the Police Department. This Officer attends the monthly association meetings and acts as a line of direct communication between the association and the Police Department.

The officer will keep the association members apprised of any new pertinent information as it may relate to their needs. In addition, the officer solicits questions and concerns from the association, and along with the Chief of Police, attempts to address and alleviate these concerns to the best of the Police Department's ability.

In addition to activities directly associated with the neighborhood watch, the liaison officer has received specific training in residential security surveys. These surveys will be offered city wide sometime in the future. The survey is intended to gauge the effectiveness of the homes security and the officer will make recommendations for the improvement of said security.
